

Chinese 3D Remote Support Engineer

As a 3D Remote Support Engineer you will work across the different support functions defining the end-to-end activity leading to the right customer solution.

Your primary roles are to:

- Provide expert support to remotely resolve hardware and/or software technical issues and application problems for our customers.
- Trigger an onsite interaction in case the issue cannot be fixed remotely. Right diagnosis and parts identification are key to ensure proper handover to the Field Services Engineer.
- Keep customers informed of the status of their case, elevating issues as needed within the Graphics Services and Support Organization and ensuring that Service Level Agreements are met.
- Document case history and interactions with customer in our Customer Relationship Mgmt. SW (CRM) to ensure proper handover to field, product/case history tracking and reporting. (Issue, Customer Inputs, Data Gathered, Troubleshooting performed, Diagnostic, Parts Dispatched, Contacts / Follow ups with customer, etc.)
- Contribute to maintain the Knowledge Mgmt. System (KMS) sharing the knowledge with the rest of the organization.
- Assist Care Center Agents and Customers on subjects such as product features, specifications, parts info and compatibility, maintenance routines, educational programs and technical aspects in general, based on customer entitlement.
- Assist Field Service Engineers during onsite troubleshooting in case of need.
- Build a close professional relationship with the primary accounts assigned through specific customer needs understanding and installed base knowledge that generates mutual trust and enhances customer experience.
- Master on Technical knowledge on 3D printing products and technologies and transmit this knowledge to our customers and peers.

We offer

- Obra y Servicio contract with long-term opportunity
- Salary depending on experience
- Transport Bonus
- Working schedule: Monday-Friday 2am-11am (night shift)
- International and dynamic environment in Barcelona
- High possibilities to grow inside the company
- Relocation package for people moving from another country

Skills Required

- This position requires solid technical skills, in order to understand/troubleshoot complex printer & system issues, along with communication skills, needed to manage interactions with customers.
- Native Chinese
- Fluent English

Education and Experience Required:

- Strong technical background with Bachelor's degree in Science/Engineering or equivalent
- Experience in a customer facing role will be valued.
- Experience in Additive Manufacturing technology, 3D Modeling Software - Magics (Materialise) and NetFabb (Autodesk) and/or 3D printing workflows will be valued
- Experience in Graphics Arts products and related technologies will be valued.
